Team Collaboration Notes

Group Number: 22

Members: Maria O' Flynn (124423752) | Anastasija Smentanina (119389906)

Team Roles

Maria – Backend, API, Docker, GHCR & Documentation (Team Collaboration and Toolchain Critique).

Ana – Testing, CI/CD, HTML, Kanban & Documentation (README.txt and Architecture Note).

Task Name	Plan	Due date	Priority	Progress
Project Setup & Repo Initialization	Create GitHub repo and define structure	3/24/2026	High	Complete
Define Requirements & Architecture	Decide app idea and system design	3/25/2026	High	Complete
Set Up Flask Application Skeleton	Create base Flask app and endpoints	3/26/2026	High	Complete
PostgreSQL Database Setup Supabase	Set up database schema and connection	3/27/2026	High	Complete
Environment Configuration & Secrets	Set up .env and secrets	4/9/2026	High	Complete
External API Integration (Basic)	Connect and fetch external API data	3/29/2026	High	Complete
Version Control Workflow Setup	Define PR and branching rules	3/30/2026	Medium	Complete
Data Aggregation Logic	Combine DB and API data	4/1/2026	High	Complete
Build Main API Endpoint	Create unified API endpoint	4/2/2026	High	Complete
CI Pipeline Setup (GitHub Actions)	Automate testing and checks	4/6/2026	Low	Complete
CD Pipeline Setup	Automate deployment	4/8/2026	High	Complete
Implement Error Handling & Resilience	Add retries and error handling	4/3/2026	High	Complete
Add Logging & Observability	Add structured logging and timing	4/4/2026	Medium	Complete
Build Status Page	Show system diagnostics	4/5/2026	Medium	Complete
Testing & Bug Fixing	Run tests and fix issues	4/10/2026	High	Complete
Documentation & README Finalisation	Write docs and instructions	4/11/2026	High	Complete
Final Review & Code Cleanup	Refactor and review code	4/12/2026	Medium	Complete
Final Deployment & Submission	Deploy and submit	4/13/2026	High	Complete

Evidence of Collaboration

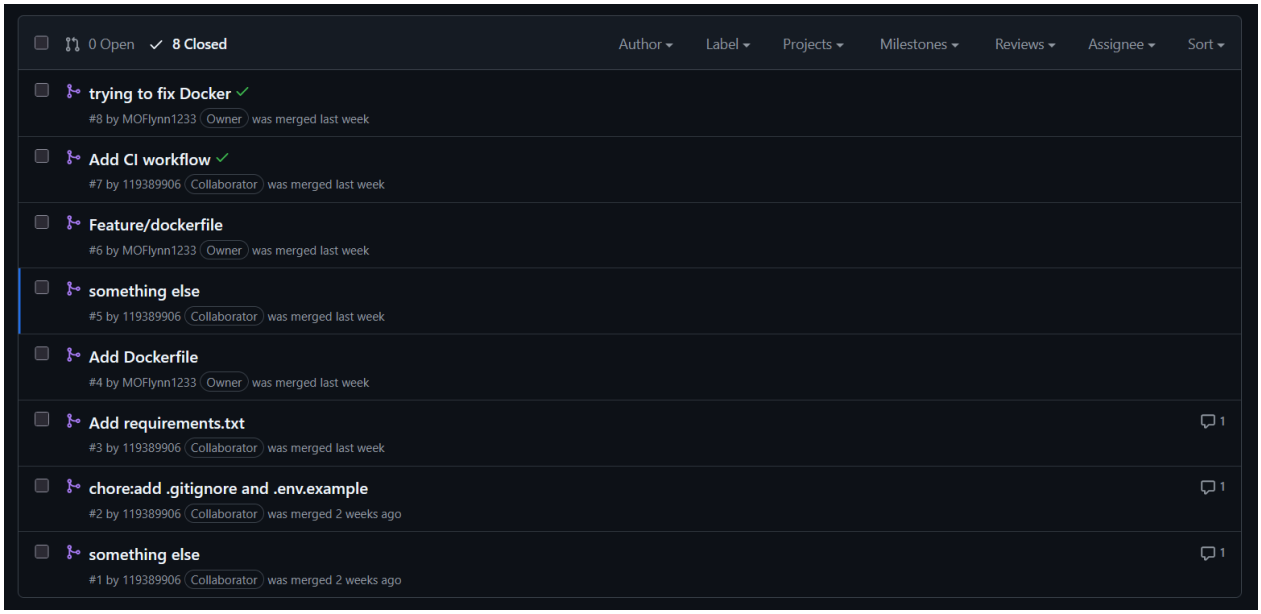

Figure 2 – Screenshot of pull requests log from Github

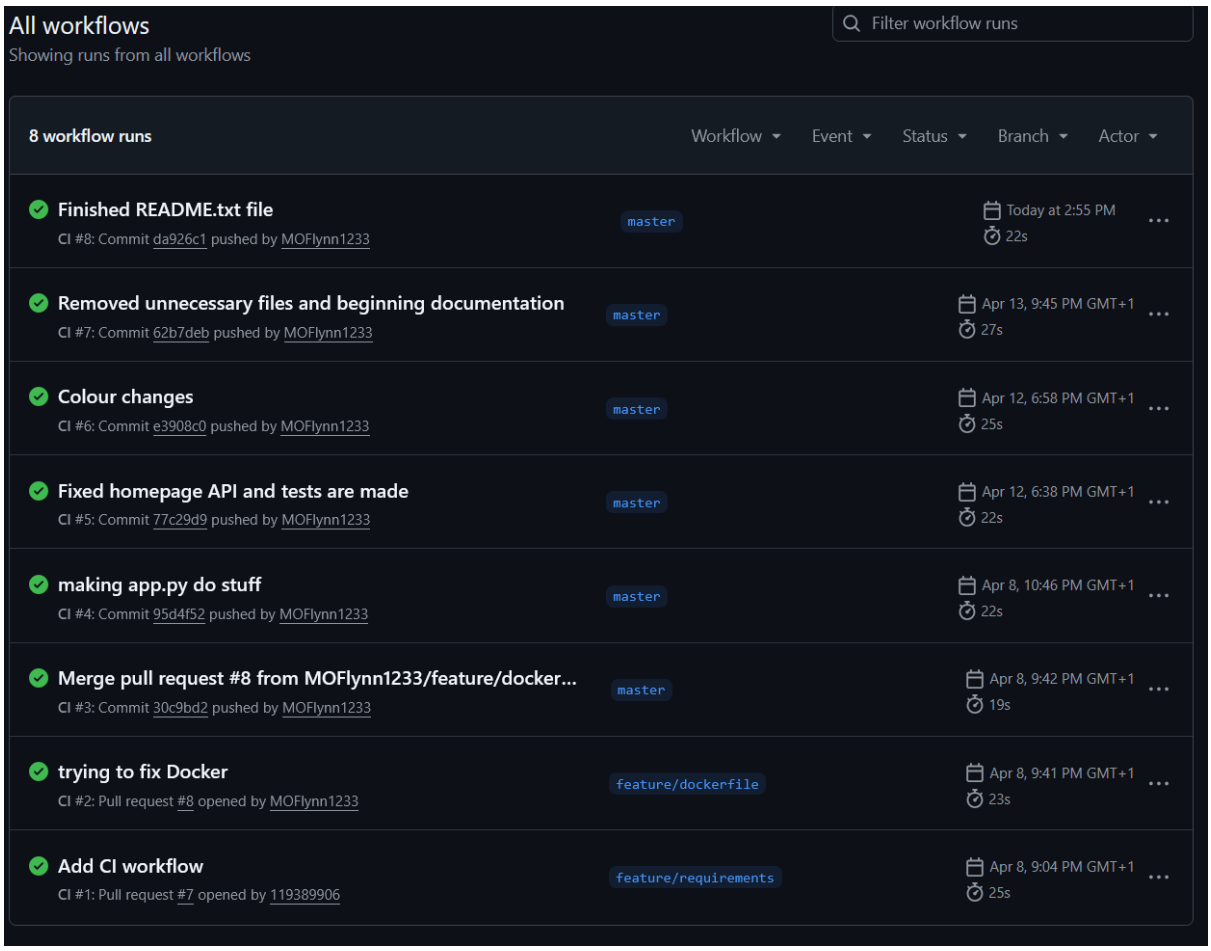

Figure 3 – Screenshot of workflows log from Github

Ceremonies

- Worked during tutorial times on Wednesdays when available.
- Held calls through Whatsapp to get things set up.
- Kept meaningful message names for any commits and pull requests to make things easier.
